

3T-PAK

3L T PAK - THE ULTIMATE 3-LEVEL PARKING SOLUTION

Maximize Your Parking Space Efficiently
Introducing the 3L T Pak, a cutting-edge 3-level hydraulic stacker designed to optimize parking spaces.

It offers superior performance with a robust 6,000 lbs per platform capacity and a user-friendly manual control system.

Key Features & Benefits

- Maximized Space Utilization - Stack up to three vehicles vertically.
- Heavy-Duty Hydraulic System - Supports up to 10 units with a shared pump.
- Simple & Secure Controls - ETL-compliant key-operated system.
- Flexible Power Options - Runs on 208/120V 3 phase pr 480/277v 3 phase).
- Fast & Efficient Operation - Lifting time of ~60 seconds per platform.
- Durable Construction - Powder-coated or optional hot-dipped galvanized steel.
- Expandable Design - Units can be installed side by side.
- Enhanced Safety Features - Emergency stop button and shutdown mechanism.

Ideal Applications

- Residential & Commercial Parking Facilities
- Car Dealerships & Vehicle Storage Lots
- Auto Repair Shops & Service Centers
- High-Density Urban Parking Developments

TECHNICAL SPECIFICATIONS

General Information:

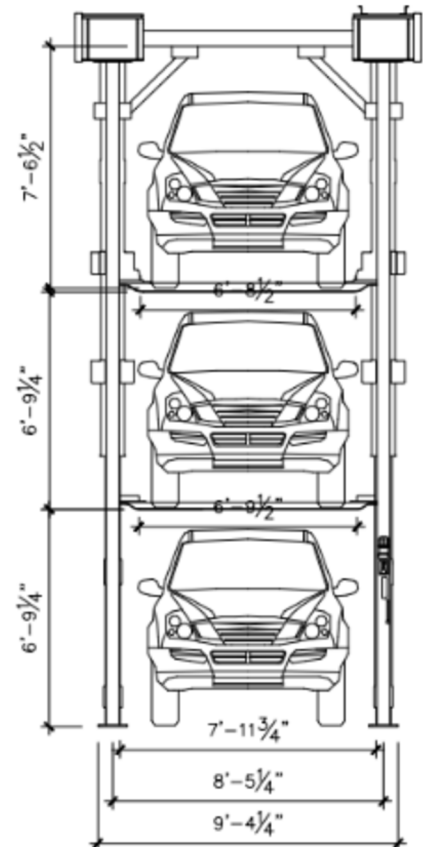

- Product Name: 3L T Pak
- Type: 3-Level Vertical Hydraulic Stacker System
- Capacity: 6,000 lbs per platform
- Drive Mode: Hydraulic
- **Power Supply:**
 - 208/120V 3 phase pr 480/277v 3 phase Single Phase, 15A
 - Shared Hydraulic Pump: 208/120V 3 phase pr 480/277v 3 phase)

Control System:

- Manual operation with level selector
- Key-controlled Up/Down function
- Emergency shutdown & stop button
- ETL-compliant control panel

Dimensions & Clearances:

- Front-to-Back Column Distance: 15' 1 3/4"
- Total Height: 22' 5 3/4"
- **Clearance Per Level:**
 - Ground Level: 6' 9 1/4"
 - Second Level: 6' 9 1/4"
 - Third Level: 7' 6 1/2"
- **Width Specifications:**
 - Between Inside Columns: 7' 11 3/4"
 - Center-to-Center Column Width: 8' 5 1/4"

3T-PAK

TECHNICAL SPECIFICATIONS

Performance & Operation:

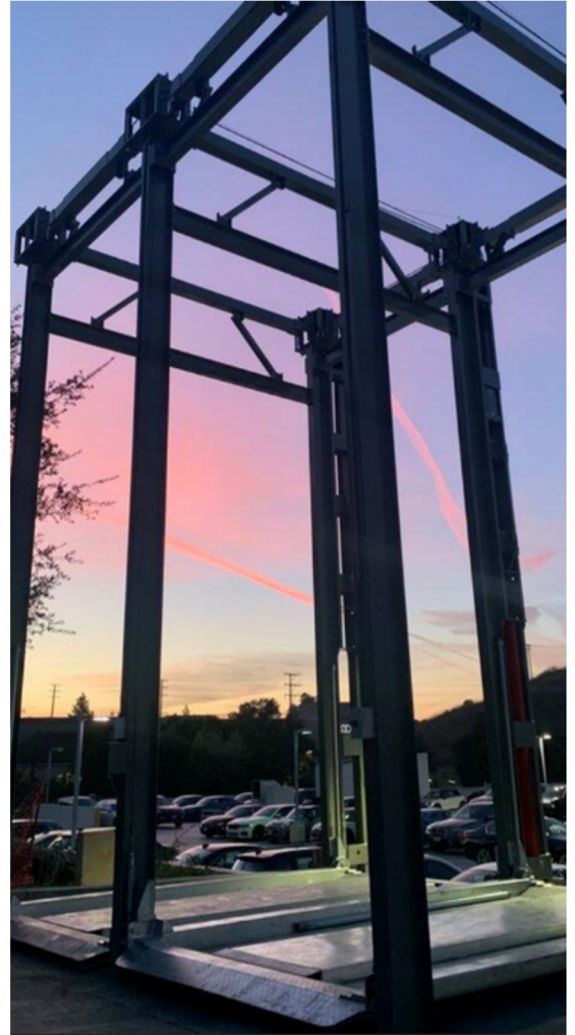

- Lifting Time: ~60 seconds per platform
- Lowering Time: Varies based on load
- Operation Flow:
 - a. Park the vehicle on the third level first
 - b. Lower the second platform and park on the second level
 - c. Lower the first platform and park on the ground level

Scalability & Expansion:

- Multiple 3L T Pak units can be combined side by side
- Shared hydraulic pump system reduces overall power requirements
- Custom hydraulic layout design required for expansions

Safety & Compliance

- ETL-certified control panel for reliability and compliance
- Emergency stop and shutdown mechanisms for added safety
- Powder-coated platforms for durability and corrosion resistance
- Optional Hot-Dipped Galvanized Coating available for enhanced weather resistance
- 1/2" heavy duty steel cable for platform lifting

TECHNICAL SPECIFICATIONS

Ideal Applications

- High-density urban parking facilities
- Car dealerships & vehicle storage
- Commercial & residential buildings
- Auto repair shops & service centers

Additional Notes

- Requires a level concrete surface for installation
- Hydraulic system must be serviced regularly for optimal performance
- Custom hydraulic layouts are available upon request

Why Choose the 3L T Pak?

- Maximize Your Parking Space: Stack up to three vehicles in the footprint of one.
- Heavy-Duty Hydraulic System: Supports up to 10 units with a shared pump.
- Fast & Efficient: Lifting time of ~60 seconds per platform.
- Secure & Reliable: ETL-certified control panel, emergency stop button.
- Customizable & Durable: Powder-coated or hot-dipped galvanized options.
- Flexible Power Options: 220V (15A) or 120V operation; shared 220V (30A) for multiple units.
